Adama, Ethiopia

About me

Result-oriented Full-Stack Developer with expertise in building scalable, responsive web applications using the MERN and PERN stacks. Proven ability to design and implement complex software solutions, from secure authentication to interactive data visualization. Committed to optimizing system performance and delivering high-quality, user-centric code.

TECHNICAL SKILLS

- MERN/Next.js Stack: Next.js, React, Node.js, MongoDB, Prisma.
- PERN/Python Stack: Django, PostgreSQL, TypeScript, REST APIs.

Frontend:

- React.js
- Next.js
- Tailwind CSS
- TypeScript
- JavaScript (ES6+).

Backend:

- Node.js
- Express
- Django
- PostgreSQL
- MongoDB
- Prisma

Tools & DevOps:

- Git,
- REST APIs,
- NextAuth,
- Framer Motion,
- Vercel.

Education

Computer Science and Engineering (CSE)2023 - present
| Adama Science and Technology
University (ASTU)

Management | Arsi University 2024 - present

Experience

- Full Stack Engineer | Self-Driven Projects Oct 2025 – Present
 - Architected and deployed the EDOT Platform, a multi-tenant education system, reducing student onboarding time by 30% through automated workflows and role-based access control.
 - Optimized database queries and API response times, resulting in a 20% improvement in overall application performance.
 - Developed modular components that improved codebase maintainability and decreased time-to-market for new features.
- Full Stack Developer | Project Aug 2025 – Sep 2025
(Employee Performance Dashboard)
 - Engineered a comprehensive Employee Performance Evaluation dashboard using Next.js and MongoDB.
 - Implemented secure authentication and role-based access control (RBAC), enabling data-driven decision-making for management.
 - Integrated real-time data visualization charts, allowing for seamless tracking of self, peer, and admin assessments.
- Frontend Developer | Learning Phase Nov 2024 – Apr 2025
 - Mastered responsive UI/UX principles, building modular interfaces that improved user interaction metrics.
 - Successfully integrated complex REST APIs and optimized frontend-backend communication workflows.

Projects

- EDOT Platform
 - Built a scalable education system with role-based workflows and interactive dashboards.
 - I built a digital ecosystem that allows educational institutions to manage courses and student progress centrally, replacing manual, paper-based tracking with a real-time system.
 - Tech: React, Tailwind CSS, Node.js, Express, PostgreSQL
- FollowFlow
 - Developed a CRM and task-tracking dashboard featuring theme-aware UI and smooth animations.
 - A client-management interface that organizes communication and project timelines into one view, ensuring no client requests are missed.
 - Tech: React, TypeScript, Django, SQLite, Tailwind CSS, Framer Motion
- Performance Evaluator
 - Automated employee assessment tool with real-time reporting and analytics.
 - I created a data-driven tool that automates employee assessments, providing management with visual performance analytics for faster, objective decision-making.
 - Tech: Next.js, React, MongoDB, Tailwind CSS, NextAuth.
- ClientFlow
 - I engineered a centralized workflow engine that synchronizes project tasks, resources, and team communication, reducing internal project bottlenecks
 - Tech: React, TypeScript, Node.js, Express, Tailwind CSS and MongoDB
